

HireGuard AI Governance Policy

Purpose

This policy establishes governance principles for the HireGuard AI platform to ensure responsible, transparent, fair, and compliant AI-assisted hiring operations.

Scope

This policy applies to:

- AI-driven candidate matching
- Resume parsing
- Governance risk analysis
- Recruitment analytics
- AI-generated hiring recommendations
- Automated workflow orchestration

Governance Principles

1. Human Oversight

AI recommendations must not be treated as final hiring decisions. Human recruiters and hiring managers retain ultimate decision-making authority.

2. Explainability

All governance decisions and AI recommendations must provide explainable reasoning where possible, including:

- candidate matching rationale
- governance risk indicators
- confidence scores
- audit traces

3. Fairness & Bias Mitigation

The platform must avoid discriminatory hiring practices based on:

- race
- religion
- gender

- ethnicity
- disability
- age
- nationality

Bias monitoring and periodic evaluation must be performed regularly.

4. Privacy Protection

Candidate personally identifiable information (PII) must be protected through:

- masking
- encryption
- access controls
- secure storage

Only authorized personnel may access sensitive candidate information.

5. Transparency

Users interacting with the platform must be informed when AI systems contribute to recommendations or analysis.

6. Auditability

All governance-sensitive actions must generate audit logs including:

- timestamps
- actions performed
- user interactions
- governance decisions
- workflow routing information

7. Accountability

All hiring decisions remain the responsibility of the organization and designated recruiters, not the AI system.

Risk Categories

Applications may be classified as:

- SAFE
- REVIEW
- HIGH_RISK

Risk classifications are based on governance analytics and confidence scoring.

Compliance Requirements

The system must align with:

- GDPR principles
- Responsible AI guidelines
- Enterprise AI governance standards
- Internal hiring compliance policies

Policy Enforcement

Violations of this policy may result in:

- restricted system access
- audit investigation
- compliance escalation
- retraining requirements

Review Cycle

This policy must be reviewed annually or whenever major AI system updates occur.
